

Note: About PDF links: If you just left click it, the link will open but it will replace the PDF. To bring it back (back button), the PDF will have to reload. This can take awhile. Ctrl click will open the link in a new tab so you have both open at once. This happens because the PDF makers have been too preoccupied with trying to keep Dick Cheney from hacking into their websites and stealing all their money and they haven't had time to figure out this link mess.

And now whooooooooooooo, whoooooooooooo!

Cosmic stuff happens. I think the dinosaurs were too big and heavy to live on Earth with its present gravity. Maybe something like a slight orbit shift occurred.....Within the last 65 million years, something changed.

I have become convinced that eons ago, some kind of creature dominated Mars as we do Earth.....and did to it what we are doing to Earth now. Mars is still there but with much less oxygen, water, gravity, magnetic field and all the good stuff needed to sustain life as we know it.

Yes, I know, I am a nut.
